P.O. Box 700, MSIN: H6-10  
Richland, WA 99352

Dear Messrs. Piper, Hatch, and Van Leuven:

Re: 219-S Waste Analysis Plan Addendum Deficiencies

The Washington State Department of Ecology (Ecology) issued a Notice of Correction to the U. S. Department of Energy (USDOE), Fluor Daniel Hanford, Inc. (FDH), and Rust Federal Services of Hanford, Inc. (RFS) on March 25, 1997. The Notice of Correction identified three violations of the Washington Administrative Code (WAC), Chapter 173-303, Dangerous Waste Regulations at the 222-S Laboratory Complex on the Hanford Site. The Notice of Correction established three corrective measures to resolve the outstanding violations by April 9, 1997. Corrective measure number three required an addendum to the 219-S waste analysis plan (Addendum) be developed to adequately address interim status verification requirements at the 219-S tank system until an approved final status waste analysis plan is in place. The Notice of Correction also required the Addendum be approved by Ecology prior to implementation.

On April 28, 1997, USDOE, FDH and RFS submitted a letter containing a proposed Addendum. In a June 5, 1997, letter Ecology advised USDOE, FDH and RFS that the Addendum would be addressed under separate cover from the other two corrective measures. This letter provides USDOE, FDH and RFS with a listing of deficiencies that must be remedied for approval of the Addendum. These deficiencies are enclosed with this letter as an attachment titled, *Deficiencies*

*in the 219-S Waste Handling Facility Waste Analysis Plan Addendum as submitted by the USDOE on April 28, 1997. These deficiencies must be resolved prior to Ecology's approval of the Addendum. Additionally, USDOE, FDH and RFS must submit a written response, which may consist of a revised Addendum, by August 8, 1997, addressing the deficiencies detailed in the attachment to this letter.*

A request for additional time to complete the actions described above must be in writing and received by me for consideration no later than August 1, 1997. If you have any questions regarding this letter, please contact me at (509) 736-3031.

Sincerely,

Bob Wilson, Compliance Inspector  
Nuclear Waste Program
